South Africa	Adjusted net national income (current US\$)	US\$ 285,611,583,349	US\$ 299,491,029,450	US\$ -
Grand Total		US\$ 14,295,796,258,705	US\$ 16,989,927,880,444	US\$ -

INSIGHTS	RECOMMENDATIONS
The year 2008 has the most net national income in dollars with a great influx from China and the least from South Africa.	
Brazil Had a dip in 2018 compared to the year 2014	
China did the most in 2018 than 2020 and other previous years	The year 2020 showed the impact that COVID-19 had on all countries over the world. Other Countries should watch out for China and emulate them in the growth of their national income per year as growth is driven by industrialization and population.
Russian Federation only showed improvement in 2014	
South Africa is the least performer in 2018 but still performed better in previous years than the Russian Federation
